

ROOT-KNOT CAN BE PREVENTED

Crop Rotation and Killing Out of Weeds Are Best Methods to Use.

Nearly 500 kinds of plants are already known to be susceptible to root-knot, and it is probable that future observations will greatly increase this number. Known under the names of root-knot, root gall, blight, etc., this disease does immense damage out of doors in all except the most northern states, and everywhere causes damage in greenhouses. It is due to a minute parasite of the nematode family, sometimes known as an ascarid, which causes the roots of susceptible plants to become so enlarged that the transfer of water to the stem and leaves is seriously interfered with. On the other hand, the entrance of harmful fungi or bacteria is made easier. In the case of cotton, for example, the root-knot parasite may be present in such small numbers as not to cause much harm itself, but may nevertheless prepare the way for wilt or black root, a fungous disease.

SOAP IS BAD FOR THE HAIR

Soap should be used very sparingly. If at all, if you want to keep your hair looking its best. Most soaps and prepared shampoos contain too much alkali. This dries the scalp, makes the hair brittle, and ruins it. The best thing for steady use is just ordinary mulled coconut oil (which is pure and greaseless), is cheaper and better than soap or anything else you can use. One or two teaspoonfuls will cleanse the hair and scalp thoroughly. Simply moisten the hair with water and rub it in. It makes an abundance of rich, creamy lather, which rinses out easily, removing every particle of dust, dirt, dandruff and excessive oil. The hair dries quickly and evenly, and it leaves the scalp soft, supple, and free from the silken, bright, lustrous, fluffy and easy to manage. You can get mulled coconut oil at any pharmacy, and a few ounces will supply every member of the family for months.—Adv.

For Acid Stomachs Use Magnesia

The almost universal use of magnesia by physicians and specialists in the treatment of stomach troubles, is due to the fact that it stops food fermentation and neutralizes the acid—the direct cause of nearly all stomach troubles. Of the many forms of magnesia such as oxides, citrates, carbonates, sulphates, etc., the most suitable and efficient, and the one prescribed by leading specialists is bicarbonate of magnesia, a teaspoonful of which in a little warm water immediately relieves all indigestion, neutralizes the acid, stops fermentation, and thus ensures painless normal digestion. Care should be taken to get bicarbonate of magnesia, as it is infinitely more effective. It is also, by the way, usually stocked by druggists in convenient compressed tablets as well as in the ordinary powder form. Stomach sufferers and dyspeptics who follow this plan, and avoid the use of peppermint, charcoal, soda, drugs and medicines are invariably astonished to find that the stomach, relieved of the irritating acid and gas, soon regains its normal tone, and can do its work alone without the doubtful aid of artificial stimulants.—Advertisement.

DOES YOUR SKIN ITCH AND BURN?

Resinol is Almost Sure to Heal It Quickly, Easily and at Little Cost.

If your skin itches and burns with eczema or any such tormenting, unsightly skin disease, simply wash the sore places with Resinol Soap and hot water, dry, and apply a little Resinol Ointment. The itching stops INSTANTLY, you no longer have to dig and scratch, sleep becomes possible, and healing begins at once. That is because the soothing, antiseptic Resinol medication strikes right into the surface, arrests the action of the disease, and almost always restores the tortured, inflamed skin to perfect health—quickly, easily and at little cost. Prescribed by doctors for twenty years, and sold by every druggist.—Advertisement.

Try Skin Absorption Instead of Cosmetics

The constant use of rouge and powder induces a congested, roughened condition of the skin, eruptions, enlarged pores, blackheads and wrinkles. If you've learned this from experience, suppose you quit cosmetics and try the following: Ask your druggist for an ounce of ordinary mercurized wax and begin using it tonight. Apply like cold cream, washing it off in the morning. Keep this up for a week. The wax will literally absorb the coarse, colorless or bluish-tinted top skin, but so gradually as not to discommode you at all. As you gradually clear, witely, naturally tinted underlayer becomes your availing friend. For those wrinkles and large pores, make a face bath by dissolving an ounce of powdered exfoliate in a half pint with water. This has remarkable softening and toning properties, and beneficial results come quickly.—Advertisement.

OUTLOOK FOR CROPS IS NOW EXCELLENT

Washington, D. C., May 12.—Continued improvement of the winter wheat outlook, promising conditions for spring wheat, a breaking of the severe drought in the eastern and central cotton belt and timely rains over the eastern portion of the corn belt, were announced in the national weather and crop bulletin issued Wednesday by the department of agriculture. The fruit outlook continues favorable in nearly all portions of the country.

TOYAH VALLEY MAKES BIG SHIPMENTS OF ALFALFA HAY

Pecos, Texas, May 12.—Daily shipments in car lots of "Pea Green" alfalfa hay are being made from Toyah valley points over the Pecos Valley Southern road. Additional cars for handling the hay was found necessary and 50 were sent into the valley from the Texas & Pacific during the past week.

APACHE COUNTY'S FRUIT CROP DECLARED TOTAL LOSS

St. Johns, Ariz., May 12.—Apache county's fruit crop is a total loss. The recent cold snap caught the buds and young fruit at just the right stage to kill them all. After the Lyman, Woodruff and Ubbell dams went out in the April flood the farmers planned to save the fruit by diverting water from the Little Colorado river by means of temporary dams, but now there is no fruit to save. The farmers of Apache county have resigned themselves to a cropless year, but hope that the dams can be reconstructed before next spring.

CROSBYTON MAN MAKES \$247 AN ACRE ON ALFALFA

Crosbyton, Texas, May 12.—J. J. Ellison, a Crosbyton man, has made a profit of \$247 per acre on alfalfa. He planted four acres as an experiment and kept account of expenses and income. Three cuttings of alfalfa were secured. From hogs, raised solely on the field, he added \$620 to his profits and also secured several calves and horses in the field. His experiment brought him enough to pay his living expenses.

A Market For \$120,000 Worth of Hats and Caps

The annual consumption of hats, caps, materials, etc., in the United States is over *One Hundred Million Dollars*. And as U. S. Government Census Statistics give 106 males to each 100 females the per capita consumption of hats and caps for males is over \$2.00 per year.

Each man or boy who buys or reads

"The El Paso Herald"

tonight purchases two or three hats a year—this means over *Sixteen Thousand Hats* consumed every twelve months by "The El Paso Herald's" 40,000 male readers.

Just where these "Herald" readers will purchase their hats, or just what make of hat they will buy, is a matter invariably open to consideration. Think of the hats these men buy on an average every week or every month in the year.

One of the most successful hat dealers in the country, and we believe, the dealer who first discovered that men wore hats the year around, has kept the style, merit and value of his hats prominently to the fore year in and year out. When he made this discovery he had one store. Today, he has 15 or 20 hat stores in some half dozen cities.

There isn't a doubt but that 15,000 or more hats will be purchased by the male readers of "The Herald" in the next few weeks.

These men get together every evening. They'll listen to what you have to say about your hats—their style, their workmanship, their distinctiveness, their shape retaining qualities and their price. You can address these men with your hat story every day if you like or as often as you desire.

As a hat dealer or a hat maker you should be interested in these hat sales. Think how your hat sales might be increased by talking to these 40,000 hat buyers every day or 3 times a week for an entire year. Remember these men and boys spend upwards of \$120,000 a year just for hats and caps. How much of this hat business are you getting now?

More Facts on Request—

THE EL PASO HERALD

EL PASO, TEXAS.

Newspaper Advertising is the shortest route between producer and consumer. It does the work quickly. It "strikes while the iron is hot." It creates interest and turns desire into sales. Besides, it reaches the greatest number of consumers in each locality 365 days in the year.

SALT RIVER VALLEY GRAIN CROP GETS TOO MUCH RAIN

Phoenix, Ariz., May 12.—As a result of the recent rains which fell throughout Arizona, the grain crop of the Salt River valley will be much smaller than was expected. The loss to the farmers will not be great, however. Following the rains much of the wheat and barley began to fall over. Instead of letting it ripen for threshing the farmers now, in many instances are cutting it for hay.
